About

AI Global Leaders in Banking Top 5 List

The **AI Global Leaders in Banking Top 5 List** recognizes an elite group of professionals who are transforming the future of banking and global finance through artificial intelligence in economics, financial risk management and advanced analytics. The list highlights individuals whose work has had exceptional technical impact, innovation leadership and enduring influence in applying AI to solve complex challenges in financial markets.

Our selection process identifies a small cohort of global leaders—representing the **top 1% of professionals worldwide** in this domain—based on a rigorous evaluation of measurable impact, sustained innovation, and recognized leadership. Honorees are chosen for their significant contributions to the advancement of AI-driven financial services, risk management and capital markets, and for shaping the direction of the industry through research, products, platforms, and real-world implementation.

The AI Global Leaders in Banking Top 5 List showcases individuals whose acclaimed work is advancing the application of artificial intelligence in financial services at a global scale. Each honoree has demonstrated a sustained record of innovation and leadership, with contributions that have been widely recognized across the industry, including publications, keynote presentations, patents, major product development, and leadership of high-impact initiatives.

Selection Criteria

Honorees are selected based on exceptional technical expertise, measurable impact, innovation leadership and enduring influence. The list represents the **top 1% of professionals worldwide** in the field, reflecting individuals who have made outstanding industry contributions to the advancement of AI in banking and finance.

MIT Technology Review showcases the AI Global Leaders in Banking Top 5 List in its July/August issue and online at www.technologyreview.com. Honorees are also featured at the EmTech MIT conference and through regional EmTech events around the world.
